				<p>Goal #2's Idea overview: This effort comes under a broad goal of "Delivering Services". It involves the identification of funding sources that are butting up against and crossing over each other. The intent is to generate clarity in one place around the fractured resource systems in our community, and then to collaboratively come up with a plan to better leverage those resources to address behavioral health challenges, ensure those with those challenges have housing and employment, and give those with clients a chance at becoming better parents, reduce intergenerational trauma and long term recidivism.</p>
